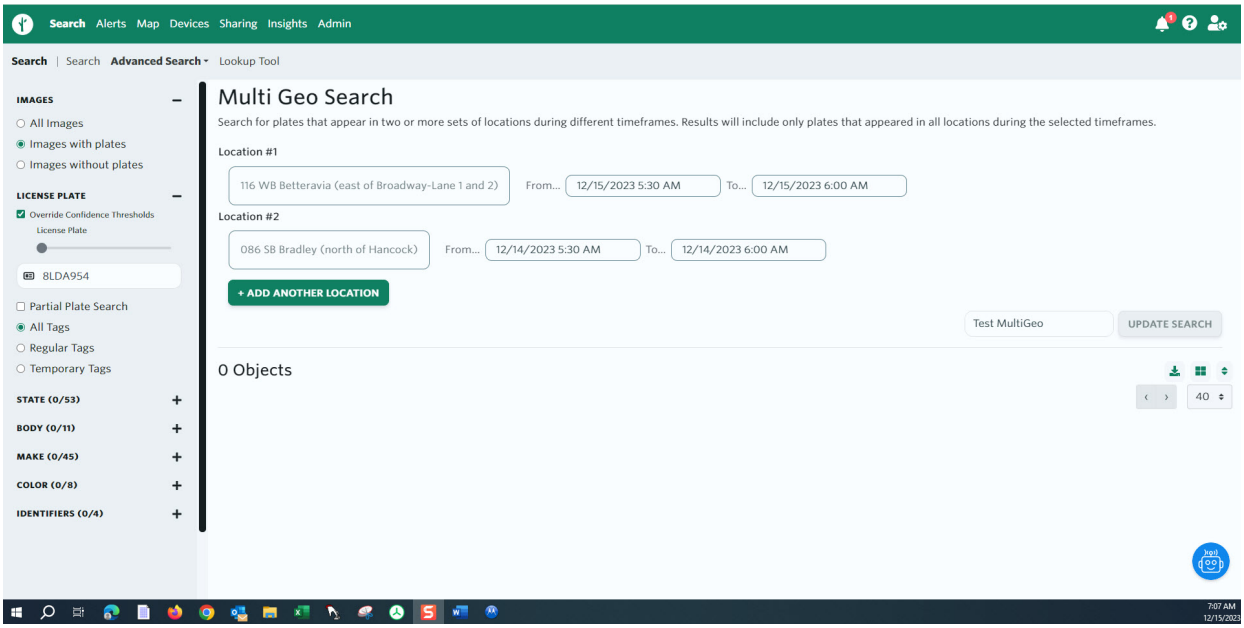
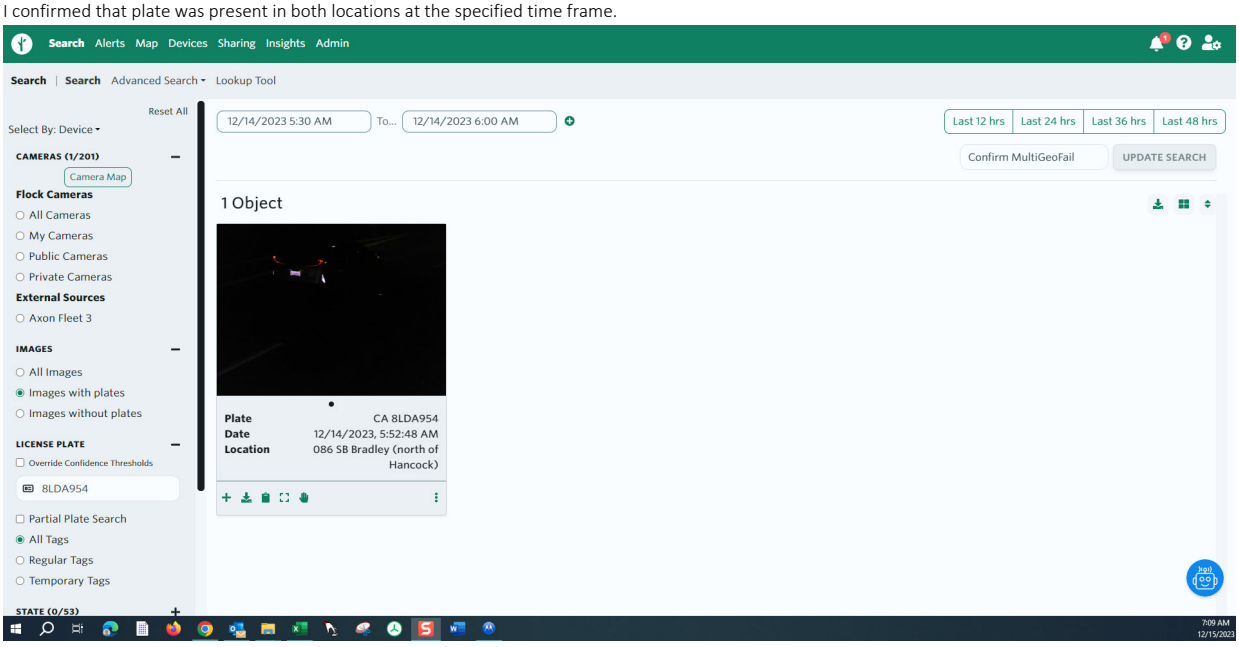
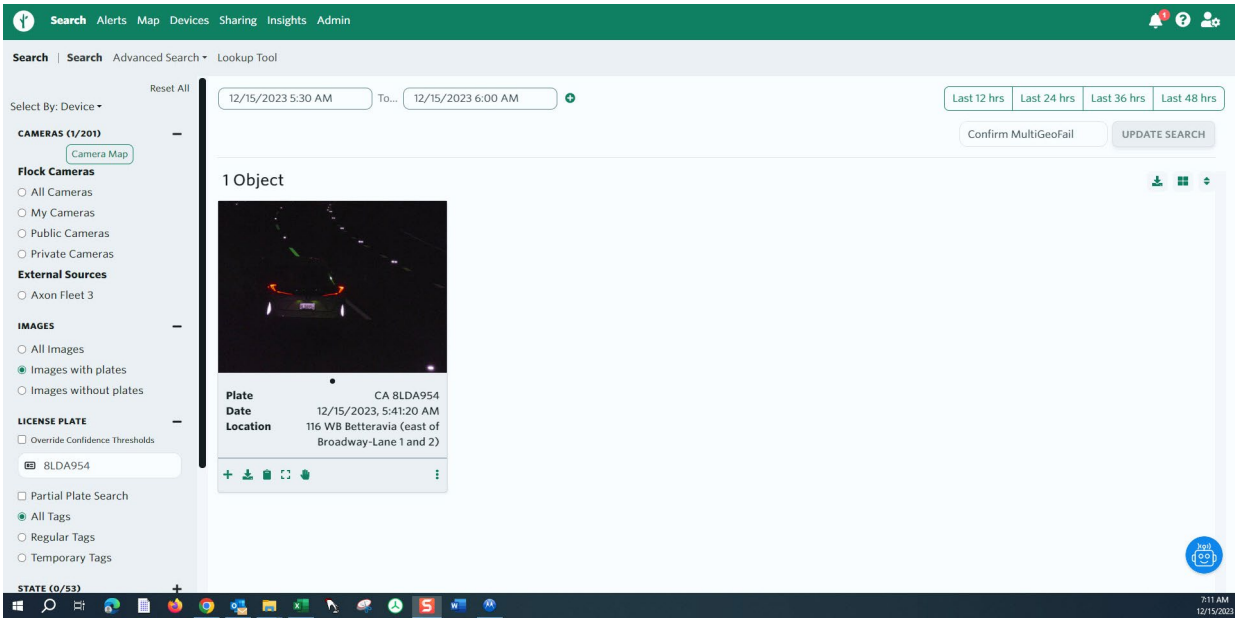
Subject: Multi-Geo search still not working
Date: Friday, December 15, 2023 7:22:58 AM

Flock safety support,
Multi-Geo search still is not working.
In testing, I ran a search for 8LDA954 for two locations cam 086 on 12/14 0530-0600 and cam 116 on 12/15 0530-0600…even overriding confidence level.
Results=0



I confirmed that plate was present in both locations at the specified time frame.





Also….I see multi-Geo has descriptors. Can a search be run with no plate (or partial) by descriptors only?

Thank you

Corporal Stephen L. Best
